

DRIVE THE CHANGE

## PRESS FLEET

This vehicle is fitted with MICHELIN Pilot Sport Cup 2 tyres. This tyre is designed primarily for Track/Fast Road use, which meets the legal requirements for use on the public highway.

Specifically optimised for use on a dry track, the MICHELIN Pilot Sport Cup 2 has a lower original tread depth. On a wet track or road, where there is a risk of aquaplaning, the driving style should be adapted by reducing speed, driving with more caution and ensuring that all safety and driver assistance systems remain switched on.
